**Foreign Economic Trade Relations between Bavaria and Saudi-Arabia;  
Company Maierhofer GmbH & Co KG**

Dear Mr. Rustom,

The economic relations between Saudi-Arabia and Bavaria, which is the largest region of Germany, have developed extremely positively over the past years. Being one of the most dynamic and successful high-tech-regions in Europe, Bavaria is offering an outstanding line-up of competitive companies. Among them are highly specialized small and medium sized companies as well as global players that offer high-quality products and services all over the world and also very successfully in Saudi-Arabia.

Therefore, I was very happy to hear that one of our traditional trade contractors, the company Maierhofer GmbH & Co. KG, was selected to construct the roof of the new Royal Terminal King Abdullah Airport in Jeddah.

As a family run business that gained vast experience for more than 150 years and over three generations, Maierhofer GmbH & Co. KG has been specialising in exclusive roof covering and storefront construction. The company is well know to our Bavarian State Ministry of Economic Affairs,

Haus der Kunst)

Infrastructure, Transport and Technology as a very reliable business partner that understands difficult and architecturally ambitious projects not as a problem but as a challenge.

Due to its extremely positive export record, Maierhofer GmbH & Co. KG was awarded “Best Bavarian Export Company 2007” in the trade category. They have executed unusual and remarkable private projects as well as large international projects such as the roofing of the IS Bank in Istanbul, Turkey, the roofing of the Opera House in Thessaloniki, Greece, or the storefront of the Nordic Embassies in Berlin.

Together with their partner KME, a leading European Group in copper processing, Maierhofer GmbH & Co. KG disposes of substantial expertise and a high level of professionalism.

I am convinced that contracting Maierhofer GmbH & Co. KG for the roof covering services for the new airport terminal was an excellent choice. Equipped with an ultramodern site in Bavaria, the 15 expert employees of Maierhofer GmbH & Co. KG pre-fabricate all components under optimal conditions. Thereby, the Bavarian company makes sure to exclusively deliver first-class products and to fulfil your technical and aesthetical requirements to your utmost satisfaction.

I wish you all the best for this project.

Best regards

Georg Reichl
